

Ø>PÙ DripJar

Full Rebrand Report

M3Jar !' DripJar

Commit: 6130810 | Generated: 2026-08-05T20:37:17.651Z

Executive Summary

This report documents the complete rebrand of the collaborative savings platform from "M3Jar" to "DripJar". The rebrand was executed in a single atomic commit titled "Rebrand M3Jar to DripJar". All customer-facing strings, email templates, API descriptions, mobile UI copy, seed data, and documentation were updated. Internal AsyncStorage key names and migration test database names were intentionally preserved. A new automated brand guard test (brand-guard.test.ts) is now part of the CI suite and will catch any reintroduction of legacy brand names into active source code.

Validation Results

Suite	Files	Tests	Status
API Server (run 1)	20	754	' PASS
API Server (run 2)	20	754	' PASS
Mobile (run 1)	10	81	' PASS
Mobile (run 2)	10	81	' PASS
API Typecheck	—	—	' CLEAN
Mobile Typecheck	—	—	' CLEAN
DB Lib Typecheck	—	—	' CLEAN
API Production Build	—	—	' CLEAN
Brand Guard (new test)	148 scanned	pass	' PASS

Files Changed — Class A (Must Change)

API Server — Lib & Routes

- artifacts/api-server/src/lib/email.ts — All email templates, subjects, sender fallback, base-URL fallback updated to thedripjar.com
- artifacts/api-server/src/lib/reminder-email.ts — Header,

footer, plain-text sign-offs in all 6 reminder email types

- artifacts/api-server/src/

routes/jars.ts —

DEFAULT_AGREEMENT_TEXT

(3 occurrences)

- artifacts/api-server/src/

routes/invitations.ts — Fallback

inviter name string

API Server — Tests

- artifacts/api-server/src/

__tests__/cors.test.ts — Test

fixtures updated from m3jar.com !'

thedripjar.com

- artifacts/api-server/src/

__tests__/password-reset-

email.test.ts — All fallback

assertions updated

Mobile App

- artifacts/mobile/app/(auth)/

index.tsx — Welcome screen

brand name

- artifacts/mobile/app/(auth)/

login.tsx — Login screen brand

name

- artifacts/mobile/app/(auth)/

register.tsx — Register screen

brand name + Terms of Service

line

- artifacts/mobile/app/reset-

password/[token].tsx — 'DripJar

account' copy

API Spec & Generated Client

- lib/api-spec/openapi.yaml —

description field

- lib/api-client-react/src/

generated/api.ts — Generated

comment

- lib/api-client-react/src/

generated/api.schemas.ts —

Generated comment

Documentation

- README.md — Full rewrite

under DripJar; historical note

preserved

- replit.md — Full rewrite;

seed email examples, PDF

name, gotcha notes updated

Seed & Scripts

- scripts/src/seed.ts — Label, 5 @m3jar.dev !' @dripjar.dev emails, AGREEMENT_TEXT
- scripts/src/generate-codebase-pdf.ts — Output filename, cover title, footer, log message

Files Changed — Class B (Should Change)

- artifacts/api-server/src/routes/download.ts — PDF const/path (M3Jar-Codebase.pdf !' DripJar-Codebase.pdf)
- artifacts/mobile/app.json — name, slug, scheme updated; bundleIdentifier/package left (owner action)
- artifacts/mobile/scripts/build.js — Comment example domain updated

New File Added — Brand Guard

- artifacts/api-server/src/__tests__/brand-guard.test.ts — Scans 148 active source files for M3Jar/TripJar/m3jar.com/@m3jar.dev patterns; any regression fails CI

Intentionally Preserved (Class C — Leave)

Internal / Not Customer-Visible

- artifacts/mobile/contexts/auth-context.tsx — AsyncStorage keys (tripjar_access_token, tripjar_refresh_token): internal only; changing them would silently log out all users
- artifacts/mobile/__tests__/auth-context.test.tsx — References those same key constants

- scripts/run-fresh-migration.cjs / .mjs — Dev test database names (m3jar_migration_verify_*): not customer-visible
- scripts/verify-fresh-migration.sh — Same internal dev DB references
- lib/db/drizzle/*.sql — Historical migration files: immutable by design
- Old closure report PDFs — Historical artifacts from prior phases

Historical Notes in Documentation (Intentional)

- README.md — 'DripJar was previously developed under the working names M3Jar and TripJar.'
- replit.md — Same historical note; gotcha entry explaining bundleIdentifier still reads com.m3jar.app

Owner Actions Required (Not Automated)

Action	Detail
Resend sending domain	Add updates.thedripjar.com; verify DNS; update EMAIL_FROM env var. Do NOT remove m3jar.com until new domain is verified.
GitHub repo rename	Rename JB102298/TripJar !' JB102298/DripJar in GitHub Settings !' General !' Repository name
APP_BASE_URL env var	Set to https://TheDripJar.com in production (Replit Secrets)
ALLOWED_ORIGINS env var	Add https://thedripjar.com,https://www.thedripjar.com
bundleIdentifier / package	Change com.m3jar.app !' com.dripjar.app in artifacts/mobile/app.json BEFORE any App Store / Play Store submission
Stripe Dashboard	Update business/public branding from M3Jar to DripJar (test mode; manual UI)
Replit display name	Update project display name to DripJar in Replit UI settings

Commit & Push

- Commit: "6130810" — "Rebrand M3Jar to DripJar"
- 22 files changed, 248 insertions(+), 114 deletions(-)
- 1 new file: artifacts/api-server/src/__tests__/brand-guard.test.ts
- Pushed to JB102298/TripJar:main via Replit GitHub integration

Brand Guard — Whitelisted Scan

Directories

- artifacts/api-server/src
- artifacts/mobile/app
- artifacts/mobile/hooks
- artifacts/mobile/contexts
- artifacts/mobile/components
- lib/api-spec
- scripts/src

148 source files scanned. 2 pattern classes checked:

LEGACY_EXACT [M3Jar, TripJar] and LEGACY_CI [m3jar.com, @m3jar.dev, updates.m3jar.com]. All pass.
